INSTALLATION INSTRUCTIONS

1. Remove lower panel from drinking fountain by removing the two screws at the lower corners. Rotate the bottom of the panel out and pull gently downward to remove.
2. Water inlet tube to be 3/8" O.D. Waste tailpiece for slip trap is 1-1/4" O.D. Contractor to supply waste trap in accordance with local codes.
3. Connecting lines to be copper and thoroughly flushed to remove all foreign matter before connection to fountain assembly. The furnished strainer should be installed in the supply line.
4. Connect the fountain to supply line with a shut off valve and install a 3/8" (10mm) water line between the valve and fountain. Connect the 3/8 line to the inlet of the strainer by loosening the retaining nut and inserting the tubing past the o-rings (approximately 3/4"). Finger tighten nut to lock tubing in place.
5. Stream height is factory set at 35 psi. If supply pressure varies greatly from this, turn adjustment screw on regulator. Clockwise adjustment will raise the stream and counter-clockwise adjustment will lower the stream. For best adjustments, stream should hit the basin 6-1/2" (165mm) from the bubbler.

ACTUATION OF QUICK CONNECT WATER FITTINGS

Fountain is provided with lead free connectors which utilize an o-ring water seal. To remove tubing from the fitting, relieve water pressure, push in on gray collar while pulling on the tubing. To insert tubing, push tube straight into the fitting until it reaches a positive stop (approximately 3/4" [19mm]). See Fig. 1.

OPERATION OF QUICK CONNECT FITTINGS
