PUSHING TUBE IN BEFORE PULLING IT OUT HELPS TO RELEASE TUBE

Care and Maintenance of Elkay Composite Fountains

The premium composite fountain provides an extremely durable, non-porous surface with resists staining. Care is very simple. Routine cleaning with a soft sponge or cloth, or with water or non-abrasive aerosol foam cleaner, is all that is normally needed to give many years of trouble free service. Cleaners left standing on the fountain surface can dull the surface finish. Be certain to rinse all cleaning agents completely and polish with a soft cloth.

Harsh abrasive cleaners are not required and should not be used.

Mild abrasives such as liquid automotive cleaning compound or baking soda paste will remove simple scratches and stains. Cigarette burns can normally be removed without noticeable effect. Deeper scratcher or gouges can be corrected with fine grit sandpaper (240 grit then 400 grit) or a green scotchbrite™ pad.

To maintain or regain luster and make cleaning easier, periodic applications of automobile wax or like products will keep the finish looking like new.

WARNING: The free-resistant box must be installed on an interior heated wall where the temperature does not drop below 50° F (10° C). The front of the box must have unobstructed air flow. Failure to maintain the interior wall temperature and the inside of the freeze resistant box above 50° F (10° C) can result in damage to the box which could result in unrestricted water flow.

LEGEND:

- A = Recommended water supply location 3/8" O.D. unplated copper tube connect
- B = Recommended location for waste outlet 1-1/4" O.D. drain
- C = Recommended location for operating cable 7/8" diameter hole
- D = Mounting holes for securing fountain to wall (blocking & wall support is required in these areas for proper support of fountains)
